Performance quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the funds may be lower or higher than the performance quoted. To obtain the performance of the funds as of the most recently completed calendar month, please visit www.mastersfunds.com.

The fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The statutory and summary prospectuses contain this and other important information about the investment company, and may be obtained by calling 1-800-960-0188, or visiting www.mastersfunds.com. Read it carefully before investing.

The performance quoted does not include a deduction for taxes that a shareholder would pay on distributions or the redemption of fund shares. Performance reflects fee waivers in effect. In absence of such waivers, total return would be reduced.

Though not an international fund, the fund may invest in foreign securities. Investing in foreign securities exposes investors to economic, political and market risks and fluctuations in foreign currencies. Though not a small-cap fund, the fund may invest in the securities of small companies. Small-company investing subjects investors to additional risks, including security price volatility and less liquidity than investing in larger companies. Multi-investment management styles may lead to higher transaction expenses compared to single investment management styles. Outcomes depend on the skill of the sub-advisors and advisor and the allocation of assets amongst them.

* The gross and net expense ratios can be found in the most recent Summary Prospectus (4/30/2017).

** The Advisor is contractually obligated to waive management fees and/or reimburse ordinary operating expenses through April 30, 2018.

Diversification does not assure a profit or protect against a loss in a declining market.

The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies as measured by total market capitalization, and represents about 98% of the U.S. stock market

Each Morningstar Category Average represents a universe of Funds with similar investment objectives.

Indexes are unmanaged, do not incur expenses, taxes or fees and cannot be invested in directly.

Active Share measures the degree of difference between a fund portfolio and its benchmark index.

Tracking Error is the monitoring the performance of a portfolio, usually to analyze the extent to which its price movements conform or deviate from those of a benchmark.

Turnover Ratio is the percentage of a mutual fund or other investment vehicle's holdings that have been "turned over" or replaced with other holdings in a given year.

Market capitalization (or market cap) is the total value of the issued shares of a publicly traded company; it is equal to the share price times the number of shares outstanding.

Earnings growth is a measure of growth in a company's net income over a specific period, often one year. The term can apply to actual data from previous periods or estimated data for future periods. **Earnings growth is not representative of a fund's future performance.**
